Summary

After a solid career of 10 years in the telecommunications area, I decided that after the birth of my son, it would be time to change the area and look for new challenges. Since June 2017, I dedicate my free time to study development, contribute to Open Source projects and improve my English, in the future (beginning of 2019) seek an opportunity as a developer. Graduate student in Data science and Big Data Analytics and in parallel I continue my studies focused on Front End, I have as main programming language "Javascript" but I also have knowledge of Python. I keep my personal codes and projects on Github and I have also developed my blog to put my learning into practice by publishing articles on development. I am also the creator of "Vue Theme", theme with more than 26000 Installs in the Visual Studio Code editor.

Work Experience

Claro S/A

Florianópolis - Brazil
