Summary

After a solid career of 10 years in the telecommunications area, I decided to change the area and look for new challenges. My free time to study development, contribute to Open Source projects and improve my English. Graduate student in Data science and Big Data Analytics and in parallel I continue my studies focused on Front End, I have as main programming language "Javascript" but I also have knowledge of Python and I love ReactJS. I keep my personal codes and projects on Github and I have also developed my blog to put my learning into practice by publishing articles on development. I am also the creator of "Vue Theme", theme with more than 44900 Installs in the Visual Studio Code editor.

Work Experience

Claro - América Móvil
Florianópolis - Brazil

DATA CENTER ANALYST II — Jul 2014 - Jun 2017

- My responsibility as an Analyst II was to be responsible for managing all routers in the cluster Florianópolis - SC Brazil and developing applications to guarantee the company's SLA.
- I created two programs using Javascript, Python, Sheel Script, HTML and CSS to monitor all network equipment and to test DNS name server resolution.
- Reducing the response time to incidents by 50% and avoiding that none of the 80 equipment went unnoticed after analyst configuration activity.
